Professional Profile

Systems Engineer with over eight years of experience developing enterprise applications, SaaS platforms, and REST APIs using PHP and Laravel. Specialized in software architecture, legacy application modernization, database optimization, systems integration, and developing scalable solutions. Experienced in designing technical solutions, refactoring critical platforms, implementing development best practices, and collaborating in agile teams under Scrum methodologies. Results-oriented professional with a strong focus on code quality, performance, maintainability, and continuous delivery of business value.

Technical Skills

Languages

PHP, JavaScript (ES6+), TypeScript, HTML5, CSS3.

Backend

Laravel 8-12, REST APIs, JWT, OAuth, Composer, Redis, Node.js, Node-RED.

Frontend

React, Livewire, Alpine.js, jQuery, Bootstrap, Tailwind CSS.

Databases

MySQL, SQL Server, PostgreSQL, MongoDB, Stored Procedures, SQL Optimization.

DevOps & Tools

Docker, Git, GitHub, Linux, Apache, Vite, Webpack, NPM, Postman.

Architecture & Best Practices

MVC, Clean Code, SOLID, Repository Pattern, Service Layer, Component-Based Architecture, SaaS Architecture, API Integration, Scrum.

Professional Experience

Way Tech

Senior Full Stack Developer

February 2024 – Present

- Developed enterprise applications using PHP and Laravel.
- Designed and implemented REST APIs for multi-system integration.
- Refactored legacy modules, reducing coupling and improving code maintainability.
- Designed technical architecture and functional documentation for new developments.
- Optimized SQL queries and Stored Procedures on SQL Server and MySQL.
- Implemented authentication using JWT and Redis.
- Developed automations using Node-RED for production processes.
- Collaborated with multidisciplinary teams using agile methodologies.

Stack

PHP, Laravel, MySQL, SQL Server, Redis, Docker, Node-RED, JavaScript, jQuery, Bootstrap, Git.

Fenacrep

Full Stack Developer

July 2020 – December 2023

- Full Stack development of a SaaS platform using Laravel and Livewire.
- Implemented new modules for financial processes.
- Integrated with external platforms via REST APIs.
- Modeled and optimized MySQL databases.
- Prepared pre-production environments and deployments.
- Developed technical and functional documentation.
- Participated actively in product evolution under agile methodologies.

Stack

PHP, Laravel, Livewire, Alpine.js, JavaScript, jQuery, Tailwind CSS, Bootstrap, MySQL, Git.

Instituto Pacífico S.A.C.

Full Stack Developer

April 2018 – June 2020

- Developed web applications using Laravel and Vue.js.
- Converted design prototypes into functional interfaces.
- Developed and maintained enterprise APIs.
- Implemented Frontend and Backend functionalities.
- Managed version control using Git.
- Collaborated with analysis and design teams.

Stack

PHP, Laravel, Vue.js, JavaScript, jQuery, Bootstrap, MySQL, Git.

Education

Bachelor of Science in Systems Engineering

Universidad Nacional Experimental Politécnica de la Fuerza Armada (UNEFA)

2005 – 2011

Courses & Certifications

- React and TypeScript: The Complete Guide (+10 Projects)
- React: Ultimate Guide (Hooks, Router, Redux, and Next.js)
- Docker: Practical Guide for Developers
- TypeScript: Complete Guide

Languages

Spanish: Native

English: B2 (technical reading and professional communication)

Strengths

- Software Architecture
- REST API Development
- SaaS Applications
- Legacy Systems Modernization
- Database Optimization
- SQL Server and MySQL
- Systems Integration
- Docker
- Redis
- Clean Code
- SOLID
- Teamwork
- Problem Solving
- Continuous Learning
